A new and exciting product range is now available from one of Australia's most trusted names in Automotive Aftermarket Electronics.

Command Parking Sensors™ offer today's discerning motorist many valuable features and benefits.

- ⇒ Assistance detecting obstacles whilst reversing your vehicle.
- ⇒ Audible alarm and optional visual display with many models.
- ⇒ Increases safety levels when children are playing near the vehicle.
- ⇒ May prevent collisions with unseen objects behind your vehicle.
- ⇒ Assists to safely park your vehicle with front and rear sensors (front sensors on selected models only)
- ⇒ Added vehicle resale value.
- ⇒ Command Parking Sensors™ are a valuable addition to your vehicle.

The CMD05 series Command Parking Sensors™ is an exceptional quality product, at an affordable entry level price.

The CMD05 series features an variable stage audible buzzer which can provide an early warning of obstacles behind your vehicle.

This series is available in a 2 sensor configuration, or 4 sensor configuration for extra ultrasonic coverage.

Part numbers    CMD05-2 (2 Sensor kit)  
                          CMD05-4 (4 Sensor kit)  
                          CMD05-4P (Premium Sensor)

The CMD16 Command Parking Sensor™ offers a quality rainbow style visible display and audible buzzer to assist with parking your vehicle.

The visible display unit can indicate to the driver that obstacles are being approached from the left or right side of the vehicle with the approximate distance, in conjunction with a variable stage buzzer.

The CMD16 product contains 4 Sensors for your vehicle designed for rear bumper protection.

Part number CMD16-4 (4 Sensor Kit)  
                          CMD16-4P (Premium Sensor)

Command Auto Group has over 40 years of extensive experience in the automotive aftermarket including provision of some of the best electronic products available, are proud to release this range to the Australian Market. Command Parking Sensors™ offers you a range of quality, reliable and high value electronic vehicle accessories.

Command Parking Sensors™ are manufactured in an ISO approved manufacturing facility and are covered by our 12 month National Service Warranty.

Command Parking Sensors™ use a quality ultrasonic sensor unit which fits neatly into the bumper of your vehicle.

All kits are supplied with black sensors which can be painted. We recommend the use of a professional tradesman for painting sensors. Hole saws are also included in each kit.

A limited range of coloured sensors are available – please contact Command Auto Group or your local distributor for availability.

Command Parking Sensor™ model CMD11 is a Super Mini LCD Screen parking sensor.

This fully optioned system is available in your choice of either 4 sensor rear bumper protection, or 6 sensor front & rear bumper protection. The unit features visual display, audible buzzer and added thermometer display. If you demand performance and features, then the CMD11 Command Parking Sensor™ is the unit for you.

Part Numbers    CMD11-4 (4 Sensor Kit)  
                          CMD11-6 (6 Sensor Kit)

The Command Camera and Parking Sensor™ offers extra safety and versatility. The mirror display with added input for DVD coupled with our compact Infra-red camera offers the ultimate in rear vehicle reversing protection.

Featuring our trusted Command Parking Sensor system with new premium sensors, the Command Camera and Parking Sensor Model is simply the best.

Part Number    CMD51-4 (4 Sensor & Camera Kit)

Command Parking Sensor™ model CMD28 provides you with the ultimate package offer. Our visible display offers a 3 colour distance display, audible buzzer, thermometer function and Auto On/Off feature with an adjustable personalised display.

This kit is available with your choice of either 4 sensor rear bumper protection or 6 sensor front & rear bumper protection.

Part Numbers    CMD28-4 (4 Sensor Kit)                    CMD28-6 (6 Sensor Kit)

Command Parking Sensors™ offer a great range of products for your vehicle. Various display units such as the Rainbow type, LCD and LED screens are available, and selected models offer extra thermometer/temperature display features.

Command Parking Sensors™ adopt the latest bionic ultrasonic sensor technology with high speed computer control to assist you with parking in those tight spots. Our quality parking sensors can be used in any weather conditions and detect obstacles from within 2 metres (detection distance may vary depending on model selected).

For further information on Command Parking Sensors™, please contact Command Auto Group or your local distributor.
